

How to work with Rheia

Changing from a conventional air distribution system to Rheia requires coordination across companies and disciplines. We developed a simple process to guide the builder, HVAC Designer and contractor through the transition to a successful production launch of Rheia.

<p>1</p>	<p>INTRODUCTION</p> <p>An engagement with Rheia starts with an introductory discussion and presentation. Rheia will present the system's value and benefits and share the Rheia engagement plan with you and your teams.</p>	<p>Goals</p> <p>Get audience up to speed on the Rheia system, benefits and path to production</p>	<p>Participants</p> <p>Leadership teams (builder and contractor)</p>	<p>Outcomes</p> <p>Buy-in to proceed</p>
<p>2</p>	<p>KICK-OFF MEETING</p> <p>Rheia will deliver an in-depth product-centric presentation discussing our approach, architectural integration needs and the design-to-pilot/ production process.</p>	<p>Goals</p> <p>Inform the builder's product team on how to integrate Rheia into their product lines.</p>	<p>Participants</p> <p>Architecture Structural Engineer HVAC Designer</p>	<p>Outcomes</p> <p>Establish the target house plans Deliver plan package to Rheia. Establish pilot/ production schedule.</p>
<p>3</p>	<p>PLAN REVIEW</p> <p>Rheia conducts a detailed plan analysis to show the available options to integrate Rheia into your floor plans using established construction details and best practices, which is reviewed with your stakeholders.</p>	<p>Goals</p> <p>Provide builder with the information needed to commit to a pilot or production program</p>	<p>Participants</p> <p>Architecture Structural Engineer HVAC design</p>	<p>Outcomes</p> <p>Schematic layouts showing how Rheia integrates with the target floor plans.</p>
<p>4</p>	<p>HVAC DESIGN</p> <p>On approval of the framing and structural integration details, Rheia will initiate the HVAC design layout utilizing the Rheia-specific plugin in Right-Suite Universal. The duct layout will be completed by a trained Rheia designer.</p>	<p>Goals</p> <p>Develop the design and details package for application into the builder's plan set.</p>	<p>Participants</p> <p>Purchasing HVAC design</p>	<p>Outcomes</p> <p>HVAC designs, BOM & pricing. Access to Rheia management tool. Architectural and structural plans are coordinated and show details.</p>
<p>5</p>	<p>FIELD HANDOFF</p> <p>Rheia ensures a smooth transition into a pilot or production environment that will be supported by the regional field management team.</p>	<p>Goals</p> <p>Transition to pilot program led by the Rheia field team. Train the contractor for quality install & commissioning.</p>	<p>Participants</p> <p>Purchasing Construction team HVAC Installer</p>	<p>Outcomes</p> <p>Successful pilot/ production start-up. Access to Rheia's commissioning tool.</p>
